

ROUTE BASED VIBRATION ANALYSIS

Certified Level 1 Vibration Analyst On staff

With Monthly, Quarterly, Or Yearly Vibration Route Readings We Can Monitor And Detect Issues Before They Fail Such As:

- **Imbalance**
- **Bent Shafts**
- **Loose Belts**
- **Rubs**
- **Misalignment**
- **Bad Bearings**
- **Rotor Issues**
- **Gearbox Issues**

This Allows You To Plan A Shutdown To Service Your Equipment Which Limits Downtime As Well As Emergency Repairs.
